SMARTPARK PROJECT

SYSTEM QUALITY ASSESSMENT CHECKLIST

No.	Quality Assessment Criteria	Y	N	N/A	Comments
1	**PARKING DETECTION AND ACCURACY**				
1.1	Do the sensors accurately identify occupied and available parking spaces?	☐	☐	☐	
1.2	Is parking availability updated in real time?	☐	☐	☐	
2	**PARKING MANAGEMENT**				
2.1	Does the system assign available parking spaces without conflicts or double-booking?	☐	☐	☐	
2.2	Does the VIP reservation system correctly manage and protect reserved spaces?	☐	☐	☐	
3	**ROBOTIC VALET SAFETY AND PERFORMANCE**				
3.1	Can the robots transport vehicles safely and navigate without collisions?	☐	☐	☐	
3.2	Are obstacle detection and emergency-stop mechanisms provided?	☐	☐	☐	
4	**MOBILE APPLICATION AND USER EXPERIENCE**				
4.1	Can users view available spaces, make reservations, and request vehicle retrieval?	☐	☐	☐	
4.2	Is the application easy to use and does it display accurate parking information?	☐	☐	☐	
5	**SYSTEM INTEGRATION AND RELIABILITY**				
5.1	Do all system components communicate and operate together correctly?	☐	☐	☐	
5.2	Does the system handle technical failures and communication interruptions safely?	☐	☐	☐
